# Eye Examination

## The Optimax Complete Eye Examination

An eye examination enables our Optometrists to examine the overall health status of your eyes. At Optimax, our eye examinations are done comprehensively with pupil dilation. Therefore, it takes more than an hour to complete. The procedure is gentle, painless and harmless.

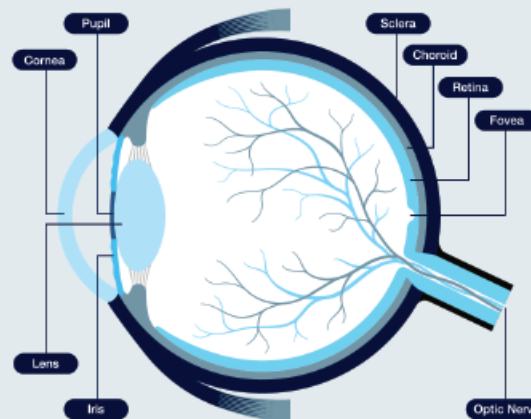

## The Optimax Complete 12 Points Check Eye Examination

- 1 Vision test
- 2 Refraction (eye power measurement)
- 3 Corneal shape assessment
- 4 Corneal thickness measurement
- 5 External eye assessment
- 6 Dry eye test
- 7 Eye pressure (glaucoma)
- 8 Eye muscle assessment
- 9 Color vision test
- 10 Amsler Grid

### After Dilation

- 11 Natural lens assessment (cataract)
- 12 Retinal (nerve) assessment

During the examination, there is a 1 to 1 counseling session with the Optometrist. An eye examination report is given upon completion of the examination.

## Why It Is Important?

- Enables early detection and treatment of various eye disorders.
- Determines suitability for any laser refractive vision correction.

### Type of Laser Refractive Treatments:

- ZEISS SMILE® Pro
- ZEISS SMILE®
- ZEISS PRESBYOND®
- Customized FEMTO-LASIK
- Customized Advanced Surface Ablation (ASA)
- Customized Trans-Epithelial Surface Ablation (TESA)

### Other Refractive Treatment

- Implantable Collamer Lens (ICL)

Regular eye check-ups ensure healthy eyesight, enabling you to perform daily tasks and enjoy activities without hindrance. Prioritize your eye health to detect issues early and maintain clear, comfortable vision.

## Eye Examination Preparation

Prior to the eye examination, please stop wearing your contact lenses for:

Soft Lenses

1 week

Soft Toric Lenses

2 weeks

Hard Lenses

3 weeks
